

Moss Beach

SR-1 CONGESTION AND SAFETY IMPROVEMENTS PROJECT

PROJECT OVERVIEW

The County of San Mateo and the San Mateo County Transportation Authority (TA), in cooperation with the California Department of Transportation (Caltrans), are initiating a project to study improvements along State Route 1 (SR-1) in Moss Beach.

The goal of this project is to improve traffic flow and safety within the project area, which includes three major intersections: SR-1/16th Street, SR-1/California Avenue, and SR-1/Cypress Avenue. Improvements for the intersections and surrounding project area may include roundabouts, signals, dedicated turn lanes, high-visibility crosswalks, pedestrian walkways, bus stop enhancements, and bike lanes.

To stay aligned with the vision of Connect the Coastside, the project aims to meet the needs of drivers, cyclists, pedestrians, and transit riders, while preserving the character of the coastal community of Moss Beach.

WHAT WE'RE EXCITED ABOUT

Increased intersection safety

Improved traffic flow

Better options for walking, biking, and using transit

Added crossings for pedestrians

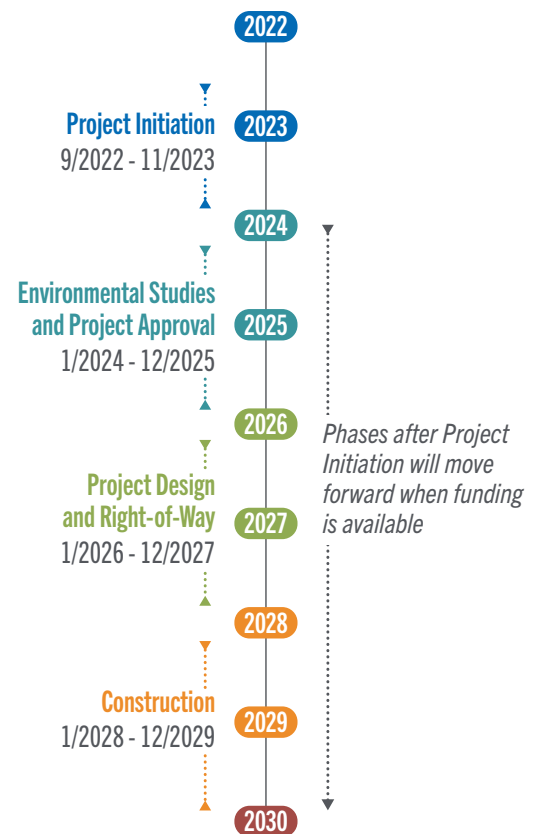

What You Can Expect

“Project Initiation,” the first phase of project development, must be completed before seeking funds and changing highways operated by Caltrans.

The purpose of this phase is to describe the challenges within the project area, identify possible solutions, and estimate the resources needed to complete these improvements.
