Good morning, I am sharing the date below that are of concern to me as a Citizen of San Mateo County.

Furthermore, I have the following questions:

- 1.) How is testing done for the DELTA variant?
- 2.) How is the County keeping track of VEARS data and educating people of the possible injuries and who will help them should they get injured?
- 3.) How is the County educating people how to take care of themselves to prevent getting sick (i.e. nutrition, sleep etc)?
- 4.) How is the County educating people about medicines to take when first symptoms arise?
- 5.) How is the County determining that we are still in the State of Emergency?
- 6.) Why are we again asked to wear masks even though we have been vaccinated?
We were told that the vaccine would "set us free" from masking?
- 7.) What is the County doing to educate business owners that they cannot legally require people to wear a mask especially when people cannot wear masks safely?
- 8.) Supervisor David Canepa, in your July newsletter you wrote:

"I was joined by infectious disease physician with UCSF Dr. Monica Gandhi who helped me cut the ribbon with COVID survivor Rolando Bonilla. It was such a big party the New York Times even showed up and made it a national story. We had a barbecue that fed nearly 400 people and live music performed by The International Café Music Society featuring Joe Vazquez.

I said "wear your damn masks" for months but **I'm ready to ditch my damn mask** and that is cause to celebrate. **In San Mateo County, we have administered more 1 million doses of the vaccine equating to about 88 percent of our residents. No more masks and no more social distancing is the freedom we need to return to our everyday lives.**

I've been following Gandhi's statements on the disease since the pandemic began 15 months ago. She studied the benefits of wearing face masks to mitigate the spread of COVID-19 and showed evidence that face coverings protected both the mask wearer and others around them."

But on June 15 Dr. Gandhi said: "San Mateo County has had a scientific and balanced approach to the pandemic throughout, saving lives while focusing on needs of children and workers. California is past the time of opening **with such high levels of immunity** so congratulations on this important day!"

Please explain, why we are supposed to wear masks again, as we ARE at a high level of vaccination and immunity based on the statements made by Dr. Gandhi, whose guidance

you seem to value.

9.) Supervisor Canepa:

In a recent statement you said:

"To those who are unvaccinated, shame on you! Shame on you!" the supervisor said.

May I remind you that you represent a wide variety of able and disabled persons, who have the right to decline a vaccination, who may have a medical or a religious reason why they CANNOT take a vaccine.

It is law to have that right as you are surely aware of.

Why the discrimination language and dividing rhetoric?

These comments provoke segregation.

10.) **Supervisor Canepa**, please apologize to the residents of this County for your remarks and assure that you will uphold your Oath to ALL residents of San Mateo County,

Here some information I gathered, to give you all some info you may not hear on CNN but these are publicly posted to read for everyone. Sources: CDC, Harvard/Stanford, VEARS (also CDC)

- **CDC: 74% who got Covid-19 and most who were hospitalized in recent analysis had been fully vaccinated.**

- **DESPITE ‘DELTA’ ALARMISM, US COVID DEATHS ARE AT LOWEST LEVEL SINCE MARCH 2020, HARVARD AND STANFORD PROFESSORS EXPLAIN**

“It is striking that COVID mortality is at such low levels despite the fact that we are seeing an increase in cases of late,” Stanford Professor of Medicine Dr. Jay Bhattacharya

Also contributing is widespread natural immunity from recovered COVID patients.

Hi, I spoke at last month's Zoom meeting to ask one or more supervisors if they could contact MILLS-Peninsula hospital CEO Janet Wagner to clarify if the Mickelson therapy pool was temporarily or permanently closed.

Since your last meeting Wagner has responded to two certified letters, basically saying the closure is permanent, primarily due to needed upgrades and repairs.

The activity of the group of former pool users and our Daily Journal published stories caused Ms Wagner to report to the Peninsula Health Care District on July 22 that there were not enough funds and the closure was thus permanent.

We have tried multiple times to alert Sutter that we have pledged donors and likely foundation grants that are / could be committed . Unfortunately our many offers to meet and bring resolve to funding the needed remodel has never even been accepted.

Could Boardmember Groom, whos district includes the Mills-Pen facilities please forward our tender offer and ask Wagner to contact / meet with us?

You already know how important the pool is to the hundreds of recent users.

We can't let the opportunity fail because Sutter is unaware of the philanthropy we have and can generate.

Thank You

Mike Schrader
