In the event of the breach of any provision of this Section, or in the event any notice is received which indicates any required insurance coverage will be diminished or canceled, County, at its option, may, notwithstanding any other provision of this Agreement to the contrary, immediately declare a material breach of this Agreement and suspend all further work and payment pursuant to this Agreement.

11. **Compliance With Laws**

All services to be performed by Contractor pursuant to this Agreement shall be performed in accordance with all applicable Federal, State, County, and municipal laws, ordinances, regulations, and executive orders, including but not limited to the Health Insurance Portability and Accountability Act of 1996 (HIPAA) and the Federal Regulations promulgated thereunder, as amended (if applicable), the Business Associate requirements set forth in Attachment H (if attached), the Americans with Disabilities Act of 1990, as amended, and Section 504 of the Rehabilitation Act of 1973, which prohibits discrimination on the basis of disability in programs and activities receiving any Federal or County financial assistance, as well as any required economic or other sanctions imposed by the United States government or under state law in effect during the term of the Agreement. Such services shall also be performed in accordance with all applicable ordinances and regulations, including but not limited to appropriate licensure, certification regulations, provisions pertaining to confidentiality of records, and applicable quality assurance regulations. In the event of a conflict between the terms of this Agreement and any applicable State, Federal, County, or municipal law, regulation, or executive order, the requirements of the applicable law, regulation, or executive order will take precedence over the requirements set forth in this Agreement.

Definitions:

Decision Making Capacity Assessment: This is a clinical evaluation of cognitive functioning which targets known factors required for intact decision making. Capacity is not a global construct and must be evaluated according to separate domains that commonly include medical, financial, testamentary, or independent living questions.

Observations/mental status, scientifically validated measures, ancillary interviews (when appropriate) and history are integrated by the expert who then opines on the capacity in question in a verbal or written report. A capacity report is most often used by stakeholders guided by ethical standards to determine if the person can reliably make a given decision or type of decision. Stakeholders may include: The Court (i.e. a Judge), attorneys, banks, hospitals, physicians, or family members wishing to support a loved one's wishes. A clinical capacity report often includes a medical legal opinion that will guide a legal proceeding, for example: a conservatorship hearing or an attorney's willingness to change estate documents. If requested or subpoenaed a neuropsychologist will testify in person regarding medical/legal opinions related to clinically evaluated decision making capacity, , conservatorship or other requirements of the Court.

(Instead of the above how about the paragraph below)

Decision Making Capacity Assessment: The principle of self-determination and autonomous decision making hinges on one's capacity to make decision. A thorough decisional capacity assessment takes into consideration key components that may include: appreciation of situation, understanding of choices, expression of reasoning, or rationalization of decisions. A capacity report can help guide stakeholders (families, attorneys, physicians, government agencies, court, hospital) in supporting a client.

1).Investigator (Staff) support can take various forms including:

- Consult/brainstorm regarding clinical questions in a current case
- Consult regarding appropriateness of neuropsychic referral for assessment
- Participation in clinical de-briefs and group supervision as needed
- Direct 1:1 consultation regarding a specific case or experience
- Multi-disciplinary team consultation as needed

2).Court Testimony: Testifying in court or being deposed by counsel can take a number of forms. Primarily in a formal court proceeding, the Contractor's role is to accurately describe and explain his/her expert opinion regarding a clinical evaluation of a given question at hand. These questions may include but are not limited to an individual's capacity to live independently, appropriateness of conservatorship, or if a question of capacity regarding financial, medical or testamentary legal concerns has made its way to court. Contractor's opinion may be presented orally or his/her testimony may be further elucidated by written opinion or report that has been previously submitted to the court.

3).Multidisciplinary Teams (MDT): The quarterly MDT may seek participation from the Contractor for consultation on difficult cases. Stakeholders and participants might include but not be limited to: SW/DPG, supervisors, law enforcement, first responders, hospital social workers , the District Attorney's Office, County Attorney's Office, Ombudsman

Services, as well as any other organizations or individuals in a professional role connected with a client's situation. These are opportunities to brainstorm, clarify the most challenging situations, and provide resources, while working together for solutions.

4). Clinical Meetings: When appropriate, the Contractor may be invited to participate in APS social workers' clinical supervision meetings. This may include consultative support regarding questions related to decision-making capacity and cognitive functioning of individuals in the community, as well as decoding family dynamics and risk assessment. Equally if not more importantly, there is a chance to hear about the APS social workers' experience and in some instances to intervene with support around the stress that they carry due to the special challenges of this work.

5). Ride-alongs with social workers: The Contractor may go with SW/DPG to meet a client prior to an assessment for decision-making capacity. It can be useful to have a co-visit before a referral has been made, to support SW/DPG's thinking about an initial assessment of what might be happening in the client's current conditions. Differential diagnosis between depression, psychosis, long-standing mental illness, substance abuse and cognitive decline, or any combination, can facilitate a service plan for the clients.
