WHEREAS, high school students who experience physical violence in a dating relationship are more likely to use drugs and alcohol, are at greater risk of suicide and are much more likely to carry patterns of abuse into future relationships; and

WHEREAS, young people victimized by a dating partner are more likely to engage in risky sexual behavior and unhealthy dieting behaviors and the experience may disrupt normal development of self-esteem and body image; and

WHEREAS, nearly half of teens who experience dating violence report that incidents of abuse took place in a school building or on school grounds; and

WHEREAS, only 33% of teens who are in an abusive relationship ever tell anyone about the abuse, and 81% of parents surveyed either believe teen dating violence is not an issue or do not know if it is one; and
