

AB 481

Military Equipment Use Policy Renewal Resolution 2023

Captain Eamonn Allen - SMSO Military Equipment Coordinator

AB 481 Requirements:

- Request governing body approval of:
 - Equipment usage policy, by way of ordinance;
 - Prior to any actions related to funding, acquisition, or use.
- Annual review of ordinance to examine efficacy of policy/equipment usage for renewal or modification.

Examples of Equipment Addressed by Policy

Lenco ARV

The Armored Rescue Vehicle has been deployed in a variety of situations to provide ballistic protection and cover for officer and civilian rescues, as well as tactical operations and high-risk security details.

Less Lethal Options

Less Lethal options such as CS gas and impact projectiles, along with their launchers, are used to bring violent encounters safely under control and prevent permanent injury or death to suspects and Deputies alike.

Unmanned Aerial Systems

Unmanned aerial systems allow for the rapid deployment of resources to search for missing endangered persons and suspects, intelligence gathering, or scene mapping. All deployments are strictly governed by FAA regulations and constitutional restrictions.

Annual Report to the Board

Annually, the Sheriff or their designee will report:

- 01 Summary of how military equipment (ME) was used.
- 02 Summary of complaints or concerns received regarding ME.
- 03 Results of internal audits, information about violations of ME use policy, and actions taken in response.
- 04 Total annual cost for each type of ME.
- 05 Quantity possessed of each type of ME.
- 06 If SMSO intends to acquire additional ME in next year, quantity sought for each type.
- 07 Within 30 days of submitting report, SMSO shall hold community engagement meeting to discuss report and answer questions. Report will also be published on SMSO website for public review.

01 Uses of Military Equipment

Bomb Squad Robot-57 Deployments

Protective Sweeps, disposals of destructive devices

UAS/Drones-46 Deployments

Search and Rescue, apprehensions, community events, scene mapping

Pepperball Launcher-7 Deployments

Utilized to de-escalate violent confrontations with IP's

Diversionsary Flashbang Devices-7 Deployments

Utilized during two different high-risk SW operations

02 Complaints

**No complaints received related to any
Military Equipment.**

03 Internal Audits/Violations/Actions

Each pepperball deployment results in an internally-generated Use of Force investigation. Each of these was found to be within policy.

06 Additional Quantities Sought

UAS

(3) DJI Mavic 3T, (4) DJI Mini 3 to replace aging fleet and add smaller, indoor-capable aircraft. Total Cost, approx. \$53,000 from Sheriff's Budget

07 Community Engagement

Community event was held on June 8, 2023

from 4-7 pm at the Coyote Point Range

- Centrally located for ease of public access.
- Publicized on Sheriff's Social Media and website.
- Military Equipment Coordinator and subject matter experts on hand to answer questions and discuss annual report.
