Treatment Definitions:

| | |
|--------------|--|
| Slurry Seal: | a mixture of asphaltic emulsion and sand sized aggregate applied to the existing road surface |
| Chip Seal: | an application of asphaltic emulsion (road oil), immediately followed by an application of small rocks called chips to the roadway surface |
| Cape Seal: | an application of asphaltic emulsion (road oil), immediately followed by an application of small rocks called chips to the roadway surface – followed by a slurry seal (a mixture of asphaltic emulsion and sand sized aggregate) approximately one week later to the road surface |
| Resurface: | an application of a thin layer of asphalt concrete to the road surface |

Notes:

1. Treatment types for various roads may be changed during the design phase to address issues such as topographic condition, traffic concerns, existing improvements, etc.
2. Actual construction schedules may vary from project to project depending upon available funding.
- ** 3. Resurfacing of Avenue Cabrillo was on the 2017 approved project list, but the project was delayed due to coordination with utility agency work on the street.
