MEASURE A 2013-2023

San Mateo County Measure A Oversight Committee Meeting

Thursday, December 1, 2016, 6:30 p.m.

College of San Mateo, College Heights Conference Room, Building 10, Room 468
1700 West Hillsdale Boulevard, San Mateo, CA 94402

January 4, 2017

RESPONSES TO QUESTIONS AND INFORMATION REQUESTS FROM COMMITTEE

1. On SMC Public WiFi, can we see a list of all sites that have been completed and planned/in progress.

See Attachment 1 from the County's Information Services Department

2. For Parks Projects, can we see a list of all projects completed and planned/in progress.

See Attachment 2 from the County's Parks Department

3. For Youth and Education category, provide more explanation on two programs that have been completed and did not meet performance targets: Parenting Education & Training and Youth Leadership Programs (HSA)

These programs are the Ravenswood School District and the YMCA, details are below:

- Ravenswood School District's Parent and Youth Academy Program was contracted to serve 60 adults and 25 youth, for \$60,000 in FY15-16. The program was not able to secure the targeted number of participants due to lack of interest and participation in the program. Even with a stipend award of up to \$300 per parent participation, the interest was not there. With an active outreach effort through phone calls, one-on-one in-person communication, the program was able to achieve 40 parent participants, and 16 youth. Due to lower than expected parent and youth participation, the total expenditures for the program was \$49,230 of the budgeted \$60,000.
- The Lewis and Joan Platt East Palo Alto Family YMCA was contracted \$40,000 to implement the Youth Government Program for 30 students. The program enrolled 17 high school students from East Palo Alto and surrounding San Mateo County communities in the fall of 2015. It was anticipated that continuous recruitment occur to reach the targeted number of 30 students for a September 2016 program start date, but a programmatic decision was made to not pursue a second leadership training in the fall. Due to lower than anticipated youth participation, the provider reduced expenses accordingly and the final contract cost was \$26,116 serving 17 youth.

4. For HOT/chronic homeless who subsequently exit to emergency shelter and transitional housing, how long do they stay in transitional housing? Do we track how many exit to permanent housing and if so, how many?

The Homeless Outreach Team (HOT) assists homeless individuals with moving toward permanent housing. Sometimes, HOT assists clients to move directly into permanent housing, and other times, HOT assists clients with moving into emergency shelter or transitional housing, as an interim step toward housing. Once the client is in an emergency shelter or transitional housing, the client can begin working with a shelter case manager to continue working toward permanent housing.

Clients served by HOT who go into an emergency shelter or transitional housing program have varied lengths of stays in those programs. Some clients may only stay a short period of time as they are searching for housing, especially if they were eligible and awarded a housing subsidy, and some may stay a longer period of time as they work on their housing plan with their case manager at the shelter. Housing plans may be finding an affordable housing complex, moving in with family or friends, applying for and documenting eligibility for a housing subsidy, or focusing on increasing income.

During FY 2015-16, of the 42 clients served by the Measure A-funded Homeless Outreach Team that moved to shelter or permanent housing, 10 clients moved into permanent housing and 32 moved into shelter or transitional housing, where they continued to work on moving to permanent housing.

5. On Motel Vouchers Program, why did it drop from 470 families in FY2014-15, to 248 families in FY2015-16?

A new policy was implemented in January 2016 which required clients to meet new eligibility criteria, including proof of San Mateo County residency, in order to be eligible for the Motel Voucher Program (MVP). Due to this new policy, the number of eligible families decreased. In addition, the methodology for counting families served by MVP shifted from FY 2014-15 to FY 2015-16 which also decreased the numbers of families reported during the year; during FY 2014-15, families were counted by the number of families served each month, regardless of if the family was served in numerous months. During FY 2015-16, families were counted as being served only once the entire fiscal year, even if they were served for more than one month. This gave more accurate information on number of families served.

For the Inclement Weather program, which provides additional shelter capacity on nights that are significantly impacted by winter weather, the Motel Voucher Program is utilized as a last resort for safety if all emergency shelter beds are full. Only under extreme or special circumstances, such as a client with severe medical issues or a high-risk pregnancy, can a client be placed with the MVP without shelter beds being full. In FY 2015-16, the Inclement Weather component of MVP served 31 families. For individuals, the Inclement Weather component of MVP served 14 individuals.

6. For affordable housing eligibility, what qualifies as “low income” and “very low income”?

“Low-income” is 80% of the Area Median Income (AMI) and “very low-income” is 50% of AMI. Income is evaluated according to family size. A family of four earning between \$61,500 and \$98,500 is considered low-income; the same family is considered very low-income if earning below \$61,500.

7. Was an affordable housing project recently completed by the County in Menlo Park?

The Willow Veterans Housing development was completed in Menlo Park toward the end of last year (2015) but no Measure A funding was involved.

To: Measure A Oversight Committee
From: Information Services Department
Date: December 16, 2016
Re: Update on the San Mateo County Public Wi-Fi Program

This memo provides the Measure A Oversight Committee an update on the progress of the Public Wi-Fi program (SMC Public WiFi). Currently, there are twenty-six SMC Public WiFi sites in operation around the County, fourteen under construction, and over sixty new sites suggested. These sites are listed as attachments to this memo, and viewed on the SMC WiFi Portal:
<http://www.smcgov.org/smc-wifi-project-data>

Since initiating the program in 2014, the Information Services Department (ISD) has made steady progress in its goal of closing the digital divide by creating wireless Internet connectivity to those in the county with limited or no access. This infrastructure was meant to serve the goal of all residents having equal access to online resources and knowledge both of which are critical to supporting our shared vision of a healthy, safe, prosperous, livable, environmentally conscious, and collaborative community. This is particularly important given that so many government services, job / health / housing information, and educational services are only available online.

To measure the use and benefit of this program users are asked provide feedback when they use the SMC Public WiFi system. Users of the system were asked the optional survey question "Tell us how this service benefits you and your community." Over 40,000 users responded by selecting one (or more) from the following reasons:

- (a) Easy access to County services – 34%
- (b) Educational opportunities – 35%
- (c) Good for local business – 32%
- (d) Service for those with limited Internet access – 49%

ISD is grateful to the County Manager's Office, Board of Supervisors and the Measure A Oversight Committee for their support in helping bring Wi-Fi services to County residents and needy communities. The success of this program is highlighted in the following video:
