REQUEST FOR PROPOSALS

Title: San Mateo County Food System Alliance Network Manager Services

The County of San Mateo is seeking proposals from any and all qualified organizations to provide Network Manager Services to coordinate and manage the San Mateo Food System Alliance (SMFSA). The purpose of the RFP is to identify a contractor that will take responsibility for staffing to provide Network Manager Services for the SMFSA. The SMFSA brings together stakeholders representing all aspects of the local food system, including agricultural producers, urban food growers, anti-hunger groups, institutional food service providers, nutrition education professionals, and those working on policies that impact the local food system and economy. Since the SMFSA was established in 2006, the work to bring together stakeholders has been led using a facilitated model. In response to the recommendation in the recently completed *Vision for a San Mateo County Food and Farm Bill*, the San Mateo County Health System and San Mateo County Office of Sustainability, who provide the core funding, in partnership with the SMFSA members has decided to shift from a facilitated model to a Network Manager model. The Network Manager services should be located within a backbone organization that will provide the necessary support to increase the SMFSA's collective capacity to address the challenges of a food system marked by social and economic inequity. The tentative target start date and term for the proposed services is December, 2018 and will go through June, 2021, subject to negotiation of a final agreement.

The committee may then recommend one or more top-ranked proposers for final negotiation of contract terms, or may invite one or more proposers for oral presentations and demonstrations, following which those proposers may be allowed to amend their proposals. After evaluating presentations and amended proposals, the committee may recommend one or more top-ranked proposers for final negotiation of contract terms.

Award, if made, will be to the responsive, responsible proposer offering the overall best value to the County for the services and goods described in this solicitation, or as applicable, for a specific portion of the services and goods described. Any agreement reached will be memorialized in a formal agreement using the attached Standard Agreement template.

6.1 SUMMARY

The purpose of the RFP is to identify a contractor that will take responsibility for staffing the Network Manager for the SMFSA. This RFP seeks responses from any and all qualified organizations to provide Network Manager Services to coordinate and manage the San Mateo Food System Alliance (SMFSA) and support the advancement of its goals and strategies. The San Mateo County Food System Alliance (SMFSA) is a collaboration of community leaders focused on creating a better future for farms, people, communities, and the environment in San Mateo County. Since its founding in 2006, the SMFSA has contributed to the understanding and policies on food system issues. Funding for the services identified in this RFP come from the San Mateo County Health System and the San Mateo County Office of Sustainability.

The SMFSA brings together stakeholders representing all aspects of the local food system, including agricultural producers, urban food growers, anti-hunger providers, school food service providers, nutrition education staff, and those working on food policy. Since the SMFSA was established in 2006, the work to bring together stakeholders has been led using a facilitator model. In response to the recommendation in the recently completed *Vision for a San Mateo County Food and Farm Bill*, the San Mateo County Health System and San Mateo County Office of Sustainability, who provide core funding for implementation of the SMFSA, have decided to hire a backbone organization that uses a Network Manager-run model to support the work of the SMFSA. The purpose of a network manager-run model is to build and maximize the capacity of the network. Moving to a Network Manager-run model from the Facilitator-led model will allow the SMFSA to expand the scope of work in order to better support partner organizations in achieving the goal of creating an equitable and sustainable food system in San Mateo County. The facilitator model focuses solely on facilitation of the members of the FSA, versus the manager model that engages directly in implementing the core strategies of the FSA.

Recognizing that SMFSA lacks official regulatory power, the influence of the FSA will come from:

1. The credibility earned by the members' dedication to improving the community,
2. Respect for others and integrity in our interactions, and
3. Rising above traditional (and sometimes) adversarial roles.
4. Leveraging the collective membership towards clear actions to advance a healthy, equitable and sustainable food system

Collective Impact Model

Research and analysis of best practices for organizing the work of a food system alliance indicates that the collective impact model is well suited to the diverse, complex, and inter-related nature of the problems associated with encouraging an equitable food and farming system, and the diverse actors affecting the various parts of the food and farming system.

There are five elements to a collective impact model, which are assessed in relation to the FSA's current assets and discussed in further detail below:

1. All participants have a common agenda for change including a shared understanding of the problem and a joint approach to solving it through agreed upon actions.
2. Collecting data and measuring results consistently across all the participants ensures shared measurement for alignment and accountability.
3. A plan of action that outlines and coordinates mutually reinforcing activities for each participant.
4. Open and continuous communication is needed across the many players to build trust, assure mutual objectives, and create common motivation.
5. A backbone organization with staff and specific set of skills to serve the entire initiative and coordinate participating organizations and agencies.

While aspects of the Collective Impact Model are currently in place, the backbone organization and the Network Manager they employ will work with SMCFSA members, along with other key stakeholders, to build on existing capacity to strengthen the five elements to ensure successful implementation of the Collective Impact Model. We are open to creative solutions for how to meet the scope of the work within the confines of the budget. See below section on “scope of work” for more details.
